Famindo Global Energi delivers clean, safe, and reliable energy to fulfill the constantly growing needs of people all around. With the continuously rising demand of natural gas within the nation, Famindo Global Energi brings a commitment to fill such a need by providing infrastructure & quick access to Natural Gas (NG) in the form of Compressed Natural Gas (CNG) and Liquefied Natural Gas (LNG) where gas pipeline is not yet available.

About Us[■]

Established in mid 2021, Famindo Global Energi aims to provide secure and affordable Natural Gas to fulfill the needs of the customers. Our shareholders put a high focus on developing gas infrastructure in Indonesia to fully support the government in boosting national economic growth. We deliver innovative businesses and sound commercial arrangements, suited to the needs of the customers by providing security of gas supply and competitive gas pricing structure in comparison to other energy supply.

With a solid operational and marketing team, we at Famindo Global Energi strive to solve the rising challenge in a stable gas supply while maintaining a safe working environment with zero accidents and providing the most reliable businesses.

To be Indonesia's most innovative gas trader and largest distributor of gas equipment.

To be a downstream gas industry leader in the operation and distribution of CNG and Gas Transportation Module (GTM).

To create value by providing innovative and sound commercial arrangements to tailor made to the needs of the people around.

To deliver maximum value to shareholders, to build competence through human resources development, solid and sound financial structure, customer satisfaction and efficiency.

■ Scope of Business

Gas Trading

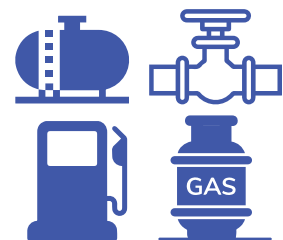

Gas Trading

Committed to being the largest CNG and LNG trader in the country, Famindo Global Energi has developed lasting relationships with customers in understanding their needs.

Gas Equipment Trading

To enhance our gas trading work scope, through the strong support from our experienced shareholders in the GTM business, we also work in gas logistics providing GTM that meets the requirements concerning transportation of gases.

Opportunities

Across the country, there are many sources of gas supplies that are underdeveloped and not commercialized due to the lack of customer access (pipeline, CNG, and LNG) with not enough demand to commercially support its development.

The economic scale and pioneering factor are the keys of our business and we believe that CNG is the fastest way to fit commercially and bring maximum value to both our stakeholders and the society around us. Famindo Global Energy aims to ensure an abundance of natural gas to deliver maximum value by reaching out to the rural areas of the country for an enhanced standard of living opportunity.

HSE Policy

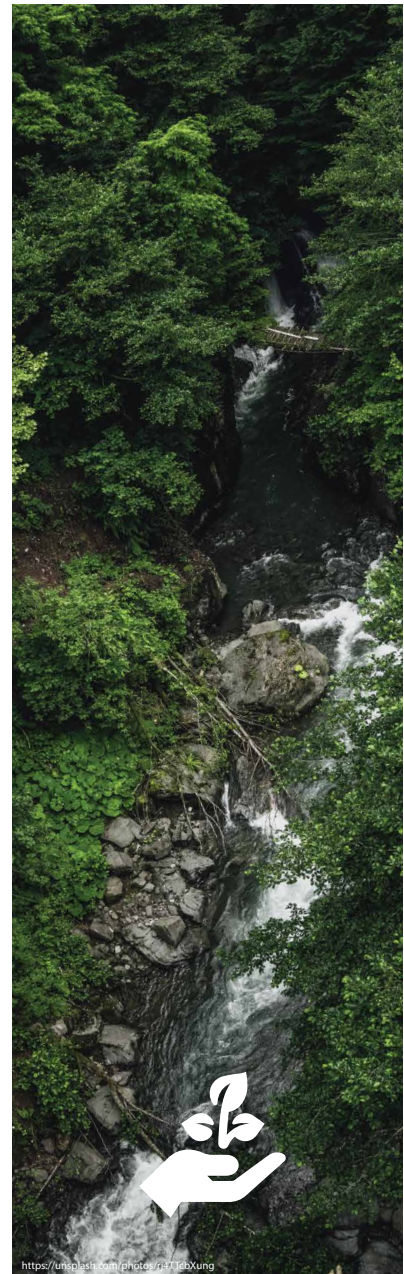

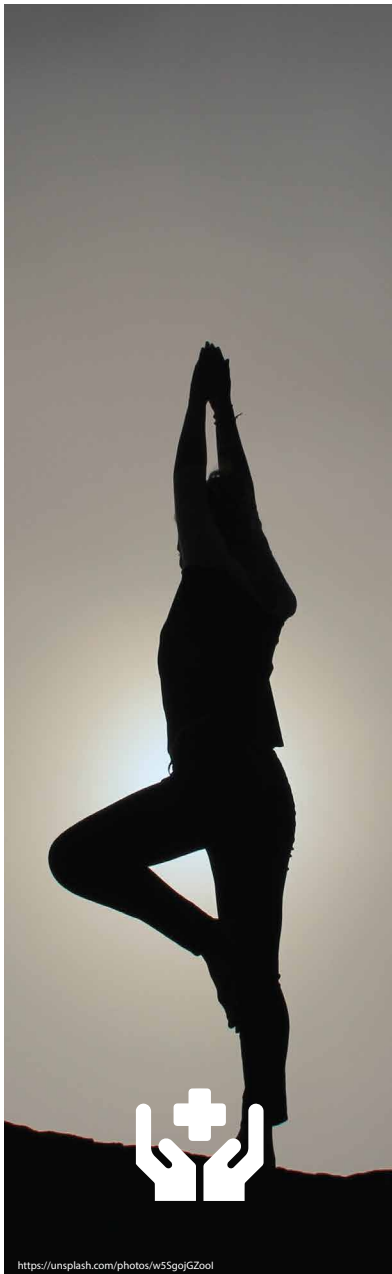

Health

Safety

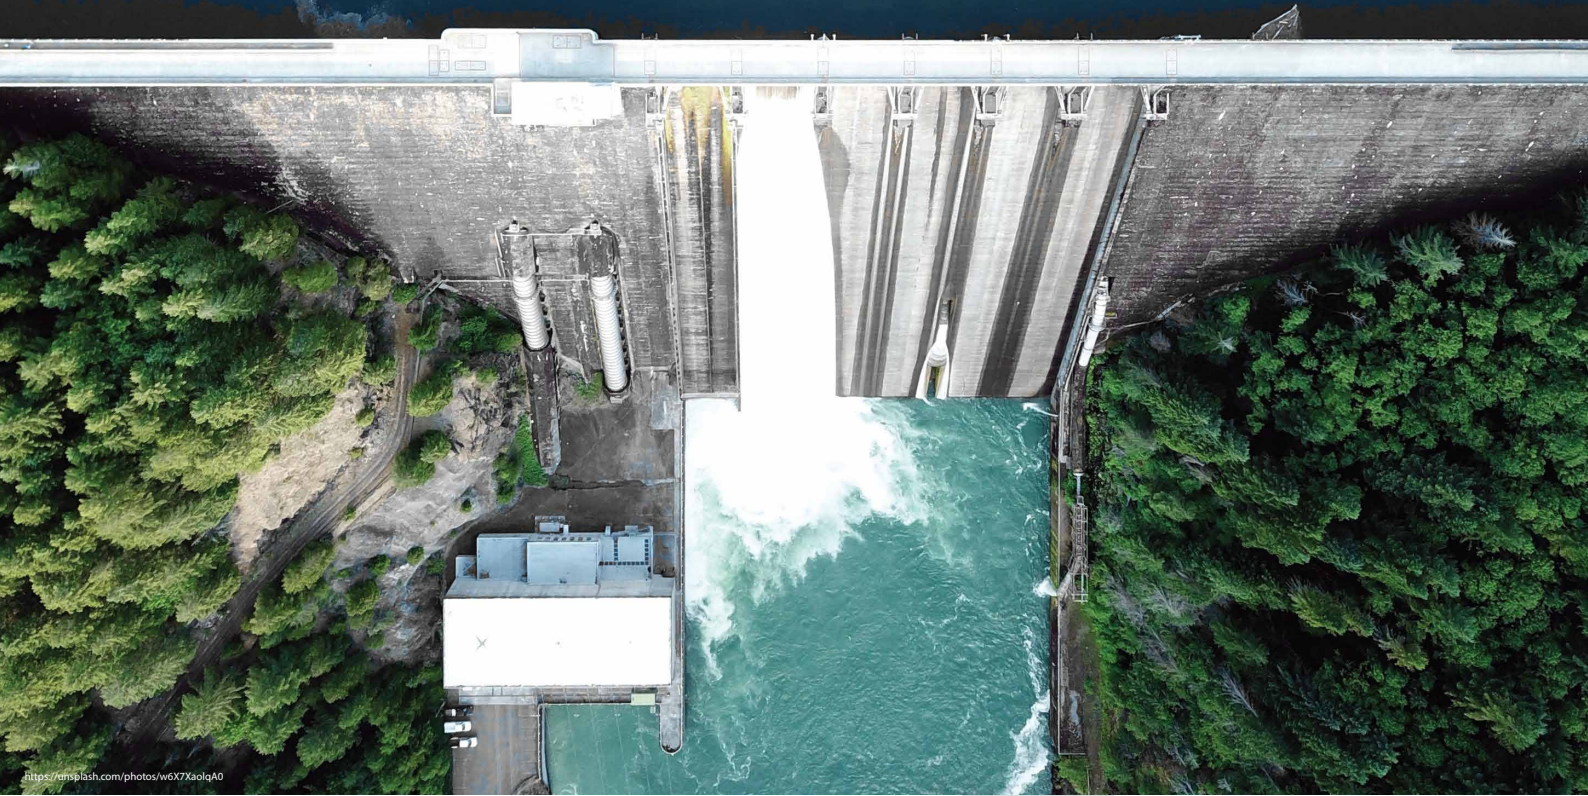

Environment

HSE Commitment

Health, Safety, and Environment (HSE) Policy is our core value at Famindo Global Energi. Without the HSE Policy put in place, our business does not exist. Our vision which is 'to be Indonesia's most innovative gas trader and largest distributor of gas equipment' won't be complete without our HSE Policy put in place that we have made a part of our daily working process. All this is done to provide a safer and healthier environment for our customers, employees, contractors and staff that play a vital role in the success of Famindo Global Energi.

HSE Belief

We believe that our outstanding business performance comes with zero injuries and as close as possible to zero environmental impact to the lives of the people around us through our activities. Our HSE Policy has been at the core of the planning and execution of every single project. Having said that, we are continuously looking for ways to improve our HSE performance every chance we get.

HSE Goal

With a strong and solid HSE Policy, we have goals to constantly communicate the practice to our internal team and external stakeholders. We promote environmentally friendly practices while implementing our programs and businesses to go beyond setting internal targets. Our system uses data from each working project to further reduce errors which in turn creates a safer operation. Simply, our goal is maximum outcome with zero harm to the people, community, and environment.

Values

Our values are what makes us the commitment driven company that we are today and to the future. Embedded into the Famindo way of working, we implement these principles in every step of the way.

Professional

Efficient

A photograph showing a complex network of yellow-painted gas pipes and a white gas meter mounted on an orange stucco wall. The pipes have various fittings, valves, and a 'GAS' label with an arrow. A black door is partially visible on the right.

Value Oriented

<https://unsplash.com/photos/r6JJZbnYZVI>

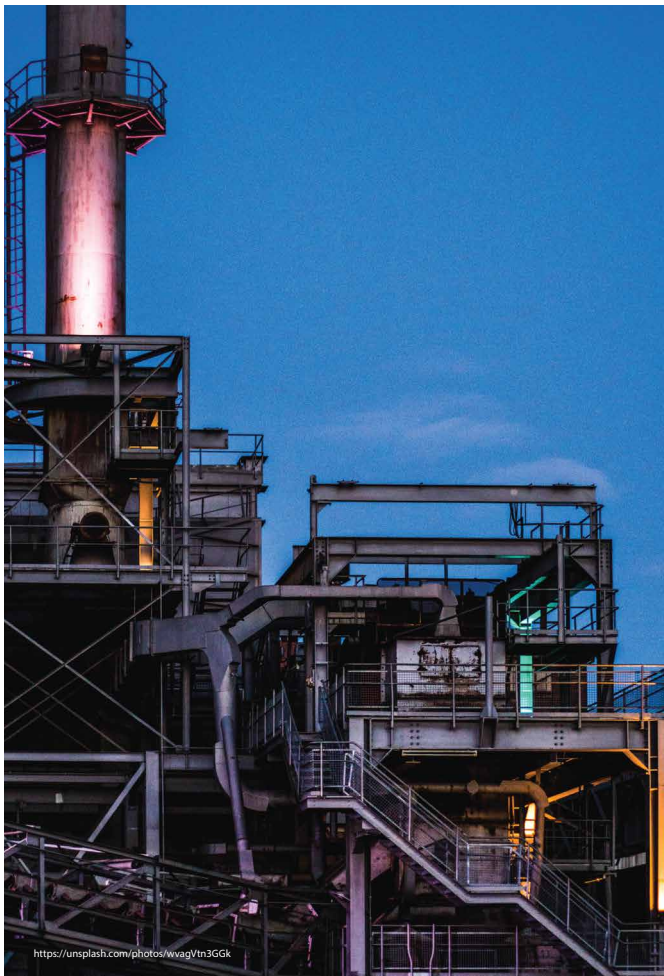

We are fully transparent with implementing our businesses, always keeping in mind our stakeholders and the society.

We pursue principles of equality, fairness, and accountability when conducting any activity.

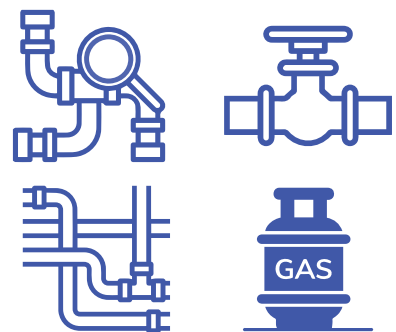

Pioneers

We strive to be the first to enter the new market in developing CNG and LNG trading as well as gas equipment business.

We have revolutionized the business of CNG by implementing new and improved methods that are easier and more accessible, for a more sustainable performance.
